Dates for a Site visit will be agreed in advance with the Customer.

4.2. Broadband and SIPConnect are not available in the event that fibre optic cable or radio access systems provide any part of the link from the Site to the local exchange.

4.4. The Customer acknowledges that the maximum ADSL speed of up to 8Mb is subject to various factors, including without limitation, local availability, distance of the Site from the nearest service enabled exchange and line tests. Broadband speed may be reduced by the number of users accessing the same internet connection at the exchange and by rate adaptation of routers. If the Customer’s line does not support up to 8Mb, JabbaTalk will offer the best speed available on the Customer’s line.

In such circumstances the Customer should use their PSTN line to make the emergency call. Furthermore it may on occasions not be possible for emergency services personnel to identify the Customer's location and telephone number. The Customer must state this information promptly and clearly when making an emergency call.

4.9. JabbaTalk will use reasonable endeavours to ensure that the SIPConnect service fault desk is available between 09.00 and 18.00 on Working Days.

Customer is found to be in breach of this paragraph 7.

### **8. Payment for SIPConnect**

Without prejudice to its other rights under the Contract, JabbaTalk may terminate or suspend the Contract with immediate effect by notice in writing if a network operator relocates any relevant DSLAM resulting in an increased distance between the exchange and the Site that means it is not technically possible to provide Broadband and/or the SIPConnect at the Site.
